

# June DECLUTTERING

DAY 8

## Clear the bathroom countertop

A clear countertop will make your bathroom feel more spacious. The goal is to keep only the items you use daily or almost daily on it.

Start by tossing/recycling any empty containers, bottles, or tubes on the countertop. Combine any duplicates you see. Check if there are any products that are expired that you should discard. Consider if you need all the remaining items or if there's anything to give away.

Remove everything from the countertop and clean it well. Then, evaluate what items to return. Consider whether you use the item daily and whether it could be stored in an easy-to-access drawer or cabinet.

Store everything else in cabinets or drawers, combining similar items together so they're easy to find when you need them.
